

Nii Amon Dsane

Product & Technology Executive | Engineering, Data & Platform Leadership

Nairobi, Kenya | jazzyy@gmail.com | +254 700 689874 | linkedin.com/in/nii-amon-dsane-69737031a

Summary

Product and technology executive with two decades of experience across digital health, fintech, government technology, marketplaces and media. Led engineering, data science and product organisations and built production systems spanning data pipelines, APIs, multi-channel products and complex integrations. Experienced translating ambiguous operating needs into technical roadmaps, hiring and managing Engineering Managers and remaining hands-on in architecture and software delivery. Current work includes AI-enabled workflows that combine language models with deterministic transactional systems.

Relevant strengths

- Technology strategy and roadmaps spanning engineering, data and product development
- Leadership of Engineering Managers and multi-disciplinary teams across engineering, data science, QA, design and product
- Data pipelines, APIs, integration architecture and production workflow automation
- Multi-channel product delivery across web, mobile, SMS, USSD and messaging
- Field-data, digital-health and national-scale data-quality systems in African operating environments
- AI-enabled system architecture with clear boundaries between probabilistic models and deterministic transactional systems

Experience

Independent | Nairobi, Kenya / Global

Independent Product & Technology Consultant / Builder | Mar 2025 - Present

- Work across product strategy, software architecture, implementation and operating-model design, with a current focus on AI-enabled marketplaces and workflow-heavy products.
- Design systems that use language models for interpretation and generation while keeping transactions, workflow state and rules deterministic.

Peach Tech Ltd | Nairobi, Kenya

Chief Technology Officer | Dec 2023 - Mar 2025

- Led Product, Engineering and IT as an executive-team member for Kenya's leading managed used-car marketplace.
- Owned financial accountability for the functions led, including budgets, delivery costs and financial targets.
- Defined product and technology strategy and led research and product design for a broader marketplace operating system.
- Led delivery of a new customer web application and vehicle intake and assessment tools.
- Hired and managed Engineering Managers and aligned Product, Engineering and IT around a common roadmap and operating cadence.

Bridge Technologies Limited | Nairobi, Kenya

CTO & VP of Engineering | Jul 2022 - Jan 2023

- Led product, engineering and architecture for an API-first fintech platform covering payments, remittances, wallets, merchant services and currency exchange.
- Owned financial accountability for the product and engineering portfolio, including budgets, delivery costs and financial targets.
- Delivered a cross-border remittance integration for MTN Group with MFS Africa, with a planned Nigerian launch giving the product potential reach to approximately 70M subscribers.
- Delivered a KCB integration for outbound remittances to Nigeria and led delivery of two consumer apps, a merchant app and APIs across four product areas.
- Served as the senior technical/delivery voice on feasibility, scope, architecture, timelines and resourcing for partner work; commercial price and contract negotiation remained with other leaders.

Living Goods | Nairobi, Kenya

Director, Software Engineering | Oct 2019 - Apr 2021

- Led software engineering for digital-health direct operations and technical-assistance programmes across Africa.
- Worked with executive leadership on technology strategy and new products driven by programme and field data.
- Grew a geographically distributed delivery organisation spanning engineering, data science, QA, design, product and project management.
- Hired and managed Engineering Managers and established an agile software-delivery lifecycle with continuous delivery and improvement.
- Led delivery of systems supporting field operations and partner programmes.

Kwara | Nairobi, Kenya

Chief Technology Officer | Oct 2018 - May 2019

- Led a five-person product and engineering team for a core-banking and operations platform serving cooperative financial institutions.
- Defined architecture and the technical roadmap, managed and mentored the team and remained active in software development.
- Partnered with the CEO on product, sales, marketing and people decisions.

Radio Africa Group | Nairobi, Kenya**Group Head of Development | Jun 2016 - Oct 2018**

- Led a 12-person shared-services team providing software development, change management and production services across the group.
- Hired and managed engineering leadership and advised the Group CEO and executives on digital-product strategy and operating-model change.
- Architected a microservices-based music-streaming platform, an asynchronous content-ingestion pipeline and mobile-money billing services.

SafariFone Ltd | Djibouti**Software Architecture Consultant | 2015 - 2016**

- Designed the architecture for a B2B marketplace connecting distributors and retailers, with embedded Murabaha trade finance for both sides.
- Designed workflows covering ordering, credit approval, financing, invoicing, repayments, inventory, suppliers and customer accounts.
- Integrated web, SMS and USSD product surfaces with the group's mobile-money and telecommunications infrastructure; built parts of the platform in Go and JavaScript.

MFieldwork Ltd | Kenya**Software Consultant | 2013 - 2015**

- Built web software for a mobile field-data platform used by NGOs and development organisations for monitoring, evaluation and field research.
- Worked on workflows moving field data from mobile collection into backend systems for analysis and visualisation.

GenKey Africa Ltd | Accra, Ghana**Lead Software Developer | Sep 2010 - Sep 2012**

- Led software-development work on biometric identity systems for national and regional governments.
- Contributed ABIS software and the Biometric Voter Register Adjudication Client to Ghana's 2012 biometric voter-registration programme, which registered approximately 14M voters using 6,500 registration kits.
- Worked directly with Ghana's Electoral Commission on demonstrations, technical delivery and training of key trainers.
- Participated in the bid team for Kenya IEBC's biometric voter-registration programme, covering registration and AFIS integration.

CoreNett Ltd | Accra, Ghana**Head of Software Development | Mar 2007 - Sep 2010**

- Led architecture and product development for mobile-wallet, cardless-ATM and electronic-payment systems.
- Designed a mobile wallet supporting transfers, agent transactions, mobile commerce and cardless ATM withdrawals.
- Built a Java and IFX-based cardless-ATM service and an electronic-payment and voucher platform using Ruby on Rails and C.

Rancard Solutions Ltd | Accra, Ghana**Product Manager, Mobile Platforms | Jan 2006 - Mar 2007**

- Managed telco-facing mobile products and services after joining first as an intern and then as a Solutions Analyst.
- Designed and implemented the messaging platform used for SMS voting for West African Idols across multiple African countries.
- Supported live messaging platforms operating across mobile-network integrations.

Education

Ashesi University College, Ghana - B.Sc. Computer Science, Cum Laude, 2005
