EXECUTIVE PROFILE

Product and technology executive with 20 years building digital products, platforms and engineering organisations across marketplaces, fintech, digital health, digital identity and media. Has led Product, Engineering and IT at executive level, including strategy, budgets and delivery. Combines product discovery and organisational leadership with hands-on software architecture. Experience spans national-scale government programmes, cross-border payments, distributed production systems and AI-native products.

CAPABILITIES

- **Product and business leadership:** Product strategy, customer research, roadmaps, operating models, portfolio delivery and executive partnership; budget and delivery-cost accountability.
- **Engineering leadership:** Built multidisciplinary teams; hired and managed Engineering Managers; established delivery practices and developed engineering capability.
- **Architecture and integration:** Distributed and event-driven systems, API platforms, payments, mobile money, data ingestion, fault-tolerant workflows and complex third-party integrations.
- **AI-native product development:** LLMs and agent workflows for interpretation and generation; deterministic systems for business rules, transactions, state and reliability.
- **Hands-on engineering:** 10+ years of production Java; Ruby, Kotlin, Go, Python and TypeScript; Rails, Spring Boot, messaging infrastructure and cloud services.

PROFESSIONAL EXPERIENCE

Independent | Nairobi, Kenya

Independent Product & Technology Consultant / Builder | Mar 2025 – Present

- Work across product definition, software architecture, technical strategy and hands-on implementation, with a focus on AI-native products and workflow automation.
- Design systems that pair language-model interpretation with explicit state machines, integrations and reliable transaction processing.

Babygoods | Nairobi, Kenya

Co-founder | Jan 2025 – Present

- Co-founded a marketplace for parents buying and selling pre-owned baby and children's items; defined the product model and core seller/buyer journeys.
- Built Instagram-based listing, moderation, buyer-offer and viewing-request workflows, connecting conversational interfaces to structured marketplace operations.

Peach Tech Ltd | Nairobi, Kenya

Chief Technology Officer | Dec 2023 – Mar 2025

- Led Product, Engineering and IT as an executive-team member; owned the technology strategy, delivery budgets, costs and financial targets.
- Led customer, operational and ethnographic research that shaped the roadmap for a managed automotive marketplace operating system.
- Delivered the customer web application, vehicle intake and assessment, systems of record, listing and yard-management tools that digitised core marketplace operations.
- Recruited and managed Engineering Managers, aligning team structure and delivery priorities with product and operational needs.

Bridge Technologies Limited | Nairobi, Kenya

CTO & VP of Engineering | Jul 2022 – Jan 2023

- Set product and technology strategy, architecture and roadmap for an API-first fintech business spanning payments, remittances, wallets and currency exchange.
- Recruited the engineering organisation and led delivery of 2 consumer apps, 1 merchant app and APIs across 4 product areas.
- Delivered an MTN Group / MFS Africa cross-border remittance integration for a planned Nigerian launch with potential access to approximately 70M MTN subscribers.
- Delivered a KCB integration enabling outbound remittances to Nigeria; held delivery-budget and cost accountability for the product and engineering portfolio.

Living Goods | Nairobi, Kenya

Director, Software Engineering | Oct 2019 – Apr 2021

- Led engineering and technology delivery for digital community-health operations and government/partner programmes in Kenya, Uganda and other engagements.
- Led technology teams supporting Kenya's national community-health digitisation and eCHIS work; Living Goods' Smart Health app became the reference tool for the national prototype.
- Worked at programme scale: during this tenure, Living Goods supported 10,000+ community health workers serving 8M+ people across Kenya and Uganda.
- Grew a distributed organisation spanning engineering, data science, QA, design, product and project management; hired Engineering Managers and introduced continuous-delivery practices.

Kwara | Nairobi, Kenya

Chief Technology Officer | Oct 2018 – May 2019

- Led a 5-person team building core-banking and daily-operations software for cooperative financial institutions; owned architecture, roadmap and technical delivery.
- Remained hands-on in development while advising the CEO on product, sales, marketing and people decisions.

Radio Africa Group | Nairobi, Kenya

Group Head of Development | Jun 2016 – Oct 2018

- Led 12 developers, designers and web administrators and advised the Group CEO and executive team on the shift towards digital products.
- Architected a music-streaming platform integrating catalogues from Universal Music Group, Sony, Africor, MCSK and others despite inconsistent formats, metadata and media assets.
- Redesigned ingestion after large Sony catalogue deliveries overwhelmed the original pipeline. Introduced Kotlin/Akka processing, RabbitMQ job fan-out and idempotent retries to isolate failures and avoid reprocessing completed renditions.
- Moved suitable media-processing workloads to AWS Lambda, scaling capacity with catalogue demand rather than maintaining peak-sized servers.
- Delivered DRM, playback reporting and rights-accounting capabilities, plus Safaricom/mobile-money billing integrations; trained the team in distributed-system design.

SafariFone Ltd | Djibouti

Software Architecture Consultant | 2015 – 2016

- Designed a B2B commerce and trade-finance platform linking import distributors to retailers, covering catalogue, orders, inventory, financing, invoicing and repayment.
- Modelled Murabaha financing and integrated web, SMS and USSD channels with the group's mobile-money network; implemented components in Go and JavaScript.

MFieldwork Ltd | Kenya

Software Consultant | 2013 – 2015

- Built web and backend systems for a mobile field-data platform serving development and humanitarian organisations, including UNHCR, DANIDA and CIDA.
- Connected mobile data collection to analysis and visualisation workflows for research, monitoring and evaluation.

GenKey Africa Ltd | Accra, Ghana

Lead Software Developer | Sep 2010 – Sep 2012

- Led product development for the Biometric Voter Register Adjudication Client, including process modelling and user interfaces.
- Contributed ABIS-related software to Ghana's 2012 biometric voter-registration programme, which registered approximately 14M voters using 6,500 kits.
- Worked with the Electoral Commission on technical delivery, demonstrations and trainer enablement; supported Kenya's IEBC biometric-registration bid.

CoreNett Ltd | Accra, Ghana

Head of Software Development | Mar 2007 – Sep 2010

- Led architecture and delivery for electronic payments, vouchers, cardless ATM and mobile-wallet products.
- Designed a mobile wallet supporting transfers, cash-out agents, merchant payments and ATM withdrawals; built Java/IFX cardless-ATM services and Ruby on Rails/C payment systems.

Rancard Solutions Ltd | Accra, Ghana

Product Manager, Mobile Platforms | Jan 2006 – Mar 2007

- Progressed from university intern to Solutions Analyst and Product Manager for mobile-network and messaging products.
- Designed and implemented the multi-country SMS voting platform used for West African Idols, integrating live messaging traffic across mobile networks.

EDUCATION

Ashesi University College, Accra, Ghana — B.Sc. Computer Science, Cum Laude | Dec 2005
